
Peer Critique of Team String Quartet

By: MitchAndWebbFans

Concepts and Features

- Be more specific about the difference between an offering and a pin
 - Be more specific about your goals
 - Are there any other features you want to implement?
Right now scope seems on the small side
-

Cool! :)

- Good graphics/screenshots for explaining the problem (map, pictures of food, stick figures walking, etc)
 - Great problem to solve! I wish I could know where free food was on the way to class.
 - ByteMap is a cute name!
-

Other Things To Consider

- Will you allow users to update status of a free food event: food is gone?
 - How will you choose what information to display on the site?
 - If it's all from emails, which email lists will you use?
How are you planning to determine what content to take out of them?
 - If people make free-food posts to the app directly, how can you prevent spam?
-
