Agande 12/5

* Security concerns
        * incoming email - as mentioned in code critique
* How to make two fields validation - for the mobile.
* What is expected in terms of testing/ unit testing
* Do we need NLP in our emails, or is it okay to assume a certain format for this project
        - note: we will try to add NLP
* Cron jobs - daily, and just hide stuff in the DB until we clear vs. clear every 15 mins
* Tips and suggestions for the final presentation
